OSA-1944-63

/ APR 1963

MEMORANDU	M FOR: Chief, Support Division, OSA
SUBJECT	: Agenda Item for Next Staff Meeting
- 146	
C-130B wa	It was our understanding that the acquisition of the s to be acquired as soon as possible. If this is still
true, the	n we will proceed to obtain flight engineer (the only ember of the crew) on a TDY loan basis.
ha	s agreed to support such action.
Eg Sin a	However, as a result of the attached memorandum and
	and subsequent conversations with we are somewhat in a quantry as to whether
we should acquisiti	pursue this matter or let things rest and await the on of a flight engineer on a permanent basis. We are
sure that	could probably use the additional
manning r	epresented in the additional pilots and navigators, but may not be important enough to effect the assignment
of office	r in May when their children may not be out of school
until the	end of May or early June (what's all the rush about. he airplane?).
***** •	Request advise as to:
	A. Whether or not we should pursue flight
	engineer on loan basis and enable us to obtain C-130 as soon as possible; and
	B. If the C-130 will not be delivered until
	July, should we move the flight crew as soon
	as they are available (May) and defer until the plane is acquired.
